

GERENCIANDO UMA STARTUP NO GITHUB PROJECTS

ELTON MINETTO

@EMINETTO

CONTEXTO

- Marketing: 3 pessoas, usando Trello
 - Produto: 1 pessoa, usando Trello
- Desenvolvimento: 3 pessoas, usando Github Issues
- Financeiro/Administrativo/Vendas: 2 pessoas, sem ferramenta

PROBLEMAS

- Falhas de comunicação (Quando fica pronto a feature? quem está fazendo o que? Quais são as próximas features?)
- Falha de integração entre os times (A feature está pronta? Não, marketing tem que preparar o lançamento! Precisamos enviar e-mails em alguns eventos)

GITHUB PROJECTS

SOLUÇÃO

- Cada equipe cria um Project para refletir o seu fluxo
- Labels são usadas para organizar os tipos de tarefas
- Tarefas podem pertencer a mais de um projeto

Backlog To do In progress Done Continue a nadar!

The image shows a GitHub project board for the 'Talent' project under the 'highway' organization. The board is organized into five columns: 'Backlog', 'To do', 'In progress', 'Done', and 'Continue a nadar!'. Each column displays a series of horizontal cards, likely representing tasks or pull requests. The cards are color-coded in various patterns, such as blue, green, red, and grey. The 'Done' column is notably large, containing 80 items, which is highlighted by a green checkmark icon next to the column header. A search bar at the top right allows users to filter the cards. There are also buttons for adding new cards and exiting full screen.

Code review na plataforma #984

Open gustavocomitre opened this issue on Aug 6 · 1 comment

 gustavocomitre commented on Aug 6 + ...

User Story

SENDO um usuário que precise de feedback sobre seu código
POSSO pedir ajuda de outros Devs para revisarem o meu código
PARA QUE receba feedbacks e melhore a qualidade do meu código.

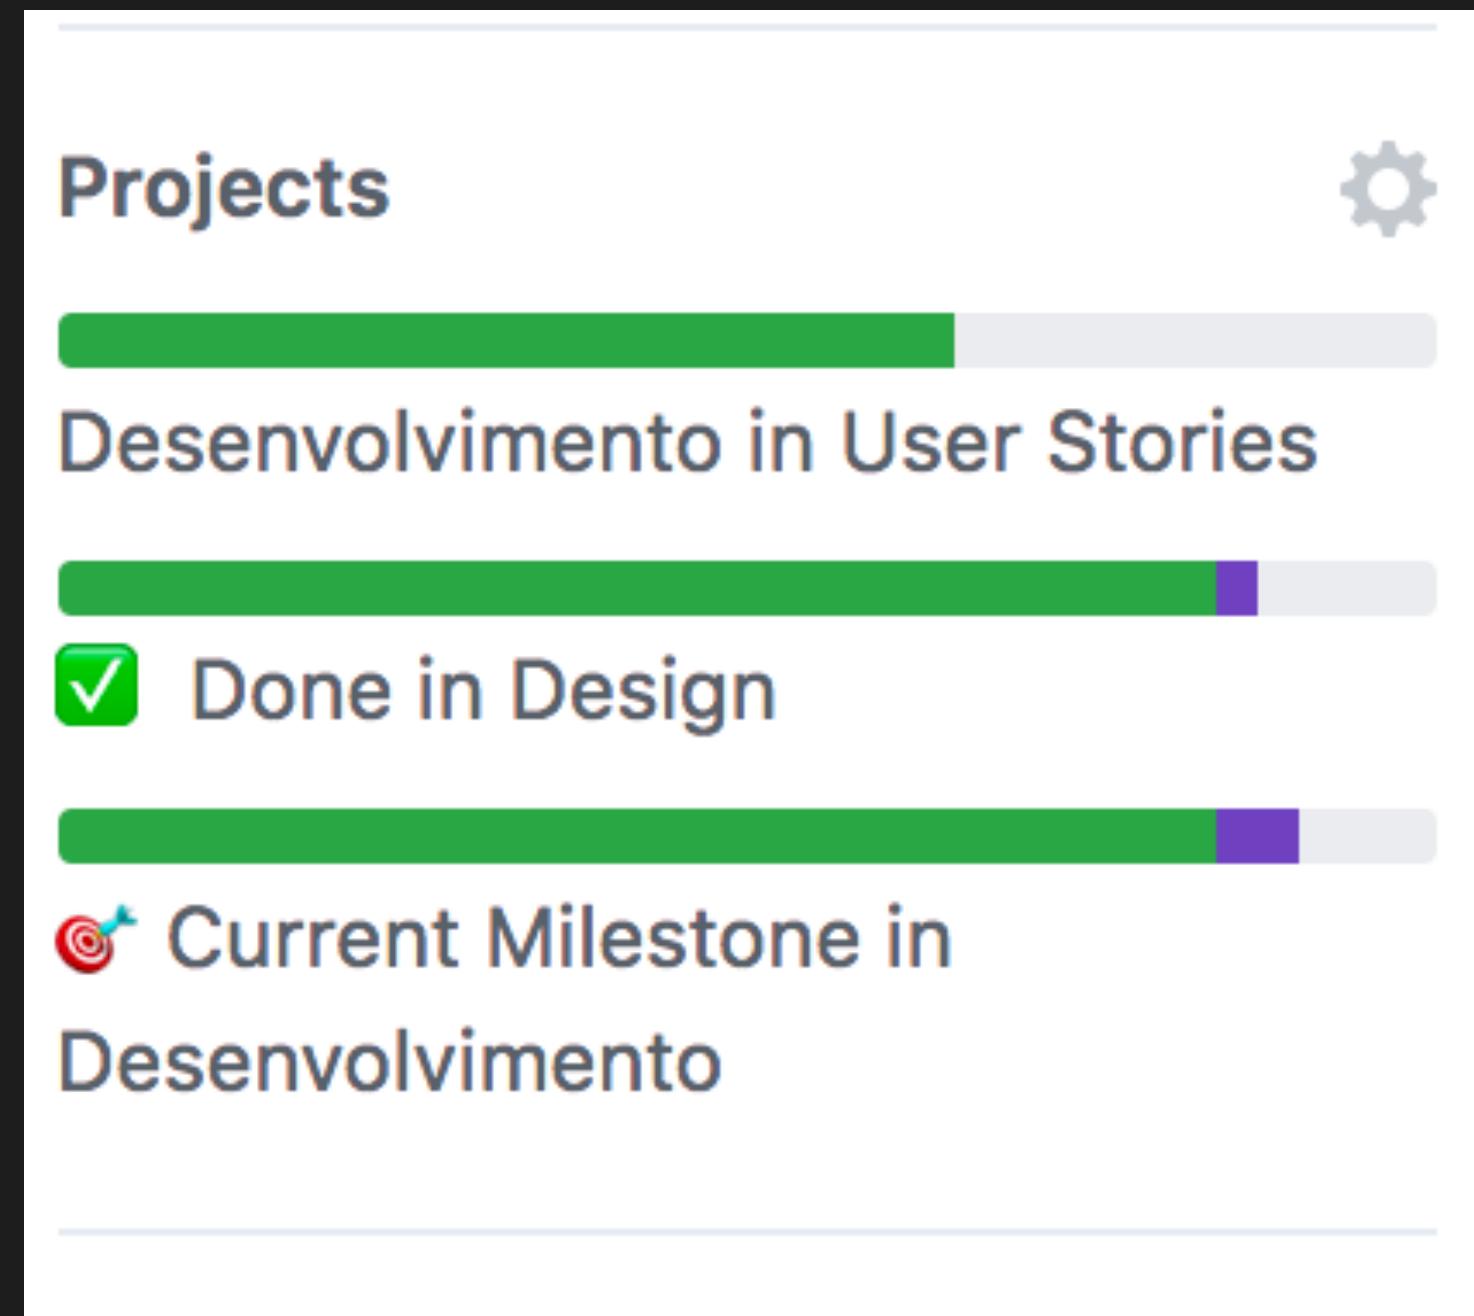

Cada tarefa criada é vinculada a uma User Story, usando as tags de referência e os templates de issues do Github

The screenshot shows the GitHub interface for creating a new issue. The top navigation bar includes links for Code, Issues (180), Pull requests (1), Projects (9), Wiki, and Insights. The current view is under the 'Issues' tab. The main area is titled 'Issue: 🤖 Task'. A sub-header explains that a Task is a specific requirement to implement an User Story or other simple requirement. Below this, the 'Title' field contains a placeholder image of a person's face. The 'Write' tab is selected, showing a rich text editor toolbar with options like bold, italic, and code blocks. The 'Preview' tab is also visible. The main content area contains the following Markdown text:

```
# Is this Task related to an User Story?  
related to #984  
---  
## Does this Task needs a special attention to any given detail?  
If so, describe it here  
## To Do  
- [ ] Sub-task 1  
- [ ] Sub-task 2
```

Below the content, there is a note: "Attach files by dragging & dropping, selecting them, or pasting from the clipboard." At the bottom left, it says "Styling with Markdown is supported". On the right side, there are configuration sections for Assignees, Labels, Projects, and Milestone. The 'Labels' section shows 'Type: Task' is selected. The 'Projects' section shows 'Desenvolvimento'. The 'Milestone' section shows 'No milestone'.

A User Story pode estar em diversos Projects, refletindo seu status em cada time

Com isso conseguimos ter todo o histórico do que aconteceu na User Story

The screenshot shows the history of two Jira issues. The first issue, #1197, titled "Define architecture to the Code Review feature", was moved from To do to Done in Design by gustavocomitre on Aug 16. It was then added to the To do in Desenvolvimento milestone via automation. A comment from eminetto referenced this issue 21 days ago. The second issue, #1207, titled "Analisar soluções para geração de syntax highlight de código para HTML", was moved from Backlog to Negócios in User Stories by eminetto 21 days ago. It was then moved from Negócios to Compliance in User Stories, from Compliance to Marketing in User Stories, and finally from Marketing to Desenvolvimento in User Stories. On Aug 16, eminetto moved this issue from To do to In progress in Desenvolvimento. A comment from eminetto referenced this issue 20 days ago. The task "Analisar soluções para geração de syntax highlight de código para HTML" has 0 of 3 tasks complete. The final transition on Aug 16 moved the issue from In progress to Current Milestone in Desenvolvimento.

- gustavocomitre moved this from To do to Done in Design on Aug 16
- gustavocomitre added this to To do in Desenvolvimento via automation on Aug 16
- eminetto referenced this issue 21 days ago
Define architecture to the Code Review feature #1197 Closed

RESULTADOS

É fácil visualizar como
o roadmap está
progredindo

– Equipe de Marketing

Gosto da facilidade que
é solicitar a ajuda de
outra área na execução
de uma tarefa

– Equipe de Marketing

Toda a equipe usa a mesma ferramenta para gerenciar tarefas, então facilita bastante a integração de atividades.

– Equipe de Produto

Flexibilidade para
moldar o fluxo
conforme necessidade

– Equipe de Desenvolvimento

Transparência, fácil
organização. Dá pra usar o
Github pra tudo, inclusive
começar no onboarding
de novos funcionários.

– Equipe de Talent Acquisition

PROBLEMAS

- Treinamento
- A interface do Github não é tão amigável quanto outras soluções
- Faltam funcionalidades como estatísticas de performance

**VAI FUNCIONAR QUANDO
A EMPRESA CRESCER?**

Não sabemos, mas estamos loucos para descobrir ;)
